

THE SMART ROAD TO SENIOR SAFETY

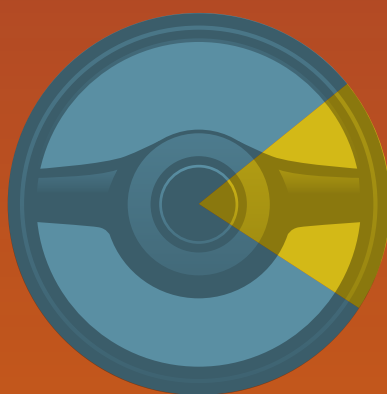

10,000

people will turn age 65 every day until 2020.

80%

of older adults report driving on a regular basis.

9 out of 10

older drivers experience one or more conditions, such as diminished vision or arthritic joints, that can negatively affect their driving.

1 out of 10

drivers selected a vehicle with features to accommodate their conditions when they purchased their last car.
